EXALEAD ONEPART REDUCE

Deduplicate existing parts to directly optimize working capital

GOING ONE STEP FURTHER: ONEPART REDUCE

EXALEAD OnePart Reduce introduces **a new way to work**, focused on **classifying and deduplicating existing parts**, thus decreasing legacy parts, simplifying the system, and cutting unnecessary costs tied up in stock.

- **Classification:** From the entire legacy universe, quality and method engineers are able to build unique categories of parts. This categorization is made up of part families and sub-families. A single representative part enables the propagation of the information across all the similar parts in the family. Thus all parts inherit the family name. Classification of parts by family facilitates part searching using OnePart.
- **Deduplication:** Once all the parts in the family are classified, specific parts can be tagged as either the master, alternate, or obsolete. The result is propagated into OnePart and the **3DEXPERIENCE** platform for reuse, and can be easily sent to the PDM and ERP systems for efficient stock management. Obsolete and duplicate parts can be removed from the system, avoiding the intensive manual effort required in the past.

With OnePart Reduce, the part decision-making process is smoother because parts can be better managed in the future, saving time and money.

WHO BENEFITS?

Engineers charged with classifying and deduplicating existing parts have at their disposal an intuitive method for doing so. Purchasing department personnel can use OnePart Reduce to pare down duplicate parts, which **streamlines the system**. Procurement is improved, as the team can negotiate more favorably with vendors based on volume. Reducing the number of parts minimizes expenditures for the financial controller, **directly impacting the balance sheet** by lowering inventory and ultimately working capital.

EXALEAD ONEPART REDUCE HELPS:

- Identify and reduce duplicate parts at scale
- Simplify clustering of parts for Procurement departments
- Free up working capital

Our 3DEXPERIENCE® platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE® Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 190,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.

REVEAL HIDDEN ASSETS REUSE LEGACY PARTS REDUCE DUPLICATE PARTS

Here the benefits of OnePart are obvious. Continuing on the path of New Part Creation leads to additional spending. While discovering all of the parts found throughout the company and Reusing them clearly saves time and money, implementing Reduce as part of an ongoing parts management program adds **significant additional value** over time.
